

This is Blackie. Blackie is Feline Leukemia Positive. She is approx. 4 months old but definitely petite. She must be an indoor cat and cannot be around other cats who are negative for Feline Leukemia. Don't let the diagnosis scare you. Blackie can live a long healthy life with the right care. She is such a love bug and loves to be pet. She has been visiting the Town Clerk's Office so feel free to come in and ask any questions you may have about Blackie. Blackie is ready for her forever home.
