

This is Chase. Chase is Feline Leukemia positive. He is 5-6 months old. He must be an indoor cat and cannot be around other cats who are negative for Feline Leukemia. Don't let the diagnosis scare you. Chase can live a long healthy life with the right care. He loves to play with his friends and although not terribly cuddly, will let you hold and pet him. He has been visiting the Town Clerk's Office so feel free to stop in and visit and ask questions. He is ready for his forever home.
