

This is Einstein. Einstein is Feline Leukemia positive. Einstein is approx. 5-6 months old. He must be an indoor cat and cannot be with other cats that are negative for Feline Leukemia. But don't let the diagnosis scare you, he can live a very long happy life with the right care. He has been the most skittish of the group. But, as you can see, has really turned the corner and is social and now he plays and loves to be held and pet. He has been visiting the Town Clerk's Office so feel free to come in and ask any questions you may have about Einstein. Einstein is ready for his forever home.
